The founders and their teams will now test their mettle against one another with the overall winner claiming the R100,000 cash prize from investment group Ayo Technology Solutions. However, the Ayo Scaling Africa Series goes beyond a single cash injection, as these businesses will also be considered for more in-depth investment funding and support from Ayo and its management team.

Top five businesses to pitch:

Dove Air provides instant access to urgent medical supplies to those across the world through advanced drone technology and has serviced over 2000 hospitals, helping local communities with vital services.

Co-founder and CEO: Francisco Martins

LiquidGold Africa offers solutions for sanitation waste with globally designed, patented, and manufactured dry toilets for both males and females. The company's focus is to save precious water resources and create new products from toilet resources (human waste) in a simple and cost-effective manner, as the by-products contains all the important nutrients that agriculture needs for healthy plant growth.

Founder and CEO: Orion Herman

Cape Town tops African tech ecosystems rankings for direct foreign investment

10 May 2021

The Marking App is a data-free mobile and web application that automatically marks school assessments while giving learners access to immediate feedback, online support, and study material. Teachers are given a detailed analysis of results, reducing time, and increasing the quality of assessment and support given to the learners. Learners can form virtual study groups and discuss any schoolwork that they need to.

Founder and managing director: Kabelo Mahlobogwane
