

WMS Implementation Technical Specialist

Remuneration:	market-related
Location:	Johannesburg
Job level:	Senior
Type:	Permanent
Company:	THE SKILLS MINE (PTY) LTD

Requirements

- Bachelor's degree in computer science, information systems, or relevant qualification
- Certificate or diploma from a WMS system provider or implementation partner showing training or competence in installing WMS solutions
- Seven years of work experience in logistics
- End-user support experience
- Experience in pharma, logistics, or wholesale and distribution industries
- Proven experience in WMS implementation and support
- Strong understanding of warehouse operations and supply chain processes
- KNAPP Kisoft Warehouse Management Systems (WMS) operational or implementation experience
- Familiarity with SAP ERP
- Functional configuration proficiency in implementing MS systems
- Writing functional specifications for business review and sign-off
- Writing technical specifications for developers to follow
- Writing test specifications and executing testing against them

Responsibilities

- Implementation and configuration: Implement and configure WMS solutions based on business requirements. This includes system setup, testing, and go-live support
- Technical support: Provide technical support for WMS including troubleshooting and problem resolution
- Training: Train end-users on the use of the WMS, ensuring they understand system functionality and capabilities
- Documentation: Document system configurations, processes, and procedures for future reference and training purposes
- Project management: For WMS change requests, manage timelines, resources, and risks to ensure WMS changes and implemented successfully and on time
