

Protect production uptime with tried-and-tested consumables

Issued by [Pyrotec](#)

4 Mar 2021

For decades, Markem-Imaje, locally represented by Pyrotec PackMark, has developed consumable solutions for customers' evolving needs and expectations. Compared to third-party supplies or 'grey' consumables, genuine Markem-Imaje consumables protect production uptime by minimising maintenance and changeovers.

In tough economic times, the grip on production costs tightens and manufacturers may be tempted to cut costs. However, opting for less expensive consumables for coders and thermal transfer printers won't save you money in the long run.

According to Brandon Pearce, Pyrotec PackMark's general manager, tried-and-tested, specifically-designed consumables may cost a little more in the short term, but long-term savings should not be overlooked.

The negative effect of 'generics'

"The harmful effect of 'grey' consumables will cost companies more money down the line as expensive printer parts become damaged, specifically in the case of Markem-Imaje's Thermal Transfer Ribbon consumables. Generic consumables harm the lifespan of the printer and printheads, forcing customers to replace expensive parts at costs far

outweighing the savings made by using cheaper alternatives,” Pearce warns.

There are distinct advantages to using the correct consumables, especially with bigger capital investment equipment such as large printers.

Premature wear and tear

At Markem-Imaje, consumables are specially developed for their intended purpose for a specific machine. An example Pearce provides are ribbons for Markem-Imaje’s Thermal Transfer Printers. “They have precise release layers and a back coating that matches the Markem-Imaje machine’s printheads. A poor quality back coating can cause premature printhead wear and damage, as well as machine malfunction from static build-up,” Pearce points out.

Less risk

Markem-Imaje consumables are extensively tested using ISO standards and are put through strict inspection criteria to ensure you receive the highest quality products. “Using cheaper alternatives negates the terms of the printer’s warranty – when something goes wrong, and it often does, you are left with a hefty repair bill that could have been avoided,” Pearce cautions.

Integrated design

Markem-Imaje’s products offer complete synergy between printers and consumables – new models are never created without considering the consumables needed to optimise their performance. “This approach guarantees the long-term reliability of coders, as well as the quality and resistance of codes,” Pearce concludes.

Pyrotec

Pyrotec is a proudly South African company with its focus aimed firmly on the future. Its five brands - Pyrotec PackMark, Pyrotec PackMedia, Pyrotec PackLink, Pyrotec PackWorx and Pyrotec Finance - make this an industry-leading company that specialises in a comprehensive range of coding and labelling equipment, on-pack informational and promotional devices, merchandising solutions, development and manufacturing of automated systems for the packaging and manufacturing industry and making finance options available to customers. Pyrotec's software offering ensures product integrity, optimises coding activities, and helps secure centralised data management systems and label tracking systems.
