

Lauren Shantall ads Indigenus as a client

Lauren Shantall (Pty) Ltd is proud to add new local furniture brand Indigenus to its stable of clients. Indigenus is a premium range of designer planters brought to life by owner and visionary Peter van der Post and designed by acclaimed South African designers such as Gregor Jenkin, Haldane Martin and Wiid. Lauren Shantall has been tasked with launching this new brand by managing publicity, media relations and communications.

Lauren Shantall currently works with top local décor and lifestyle brands such as Plascon, Inhouse Brand Architects, Willowlamp and Probio, and thus meets Indigenus's need for an agency with a rich design background. Lauren Shantall provides an integrated communications offering, spanning social, digital and traditional marketing and perception management, focusing on design, décor and "green" clients.
