

# Cav's Platform Dialogue Forum for greater industry discussion on animation

The first Cav' Platform Dialogue Forum kicks off the series with a focus on incubators as a model for transformation. Titled 'Innovating in the incubator space through hybrid models', this dialogue considers the current ASA incubator 'Road to Commercialisation - Broadcast Readiness Incubator', headed up by ASA's Isabelle Rorke. This dialogue will explore how the ASA incubator has impacted the candidates and how this model can be expanded for greater transformation through entrepreneurial and general skills development for sustainable job creation. The event will also be live-streamed through the Animation SA and Cav' Platform Facebook groups.
