

Varian and Icon Oncology partner to establish value-based cancer treatment hub for southern Africa

Issued by [Icon Oncology](#)

17 Dec 2021

Varian, a Siemens Healthineers company, has announced an agreement with Icon Oncology, South Africa's leading oncology provider, that will enhance access to cancer care through a value-based cancer treatment hub for the southern Africa region. The strategic partnership includes investment in seven new linear accelerators, including Halcyon® and TrueBeam® radiotherapy systems, and associated software solutions. Varian will also be partnering with Icon Oncology to support skills development and local training of its professional staff and provide maintenance support for Varian machines.

The partnership was celebrated by Simon Meredith, Varian GM and country lead, South Africa; Anthony Pedersen, CEO Icon Oncology and Zaidah Amtay, Varian sales, sub-Saharan region.

Varian's radiotherapy systems will be installed in new and existing Icon Oncology centers in South Africa, expanding Icon Oncology's existing fleet of 32 Varian linear accelerators in the country. This represents a significant volume of innovative cancer care technology that contributes to establishing Icon Oncology as a cancer treatment hub for patients across the Southern Africa region. The continued investment and strong partnership aim to increase treatment capacity and broaden patient access to care in a region where cancer rates are expected to rise significantly over the next two decades.¹

The partnership will deliver state-of-the-art technology like the recent Varian Halcyon Linac which was commissioned in Bloemfontein in November this year.

“We are leading the way in addressing the increasing cancer burden in the region by securing the highest quality, cost-effective cancer care for the greatest number of patients,” said Anthony Pedersen, CEO of Icon Oncology. “The strategic partnership with Varian will drive the adoption of value-based care to deliver better patient outcomes and contribute to our intent of establishing a value-based cancer care hub for the entire Southern Africa region.”

Icon Oncology commissioned a Varian Truebeam earlier this at its flagship integrated oncology unit based at Mediclinic Constantiaberg.

"As the cancer burden continues to rise, we are proud to partner with Icon Oncology to not only expand access to advanced cancer care across the Southern Africa region but also to grow and develop the crucial skillset and talent to achieve a world without fear of cancer," said Kevin O'Reilly, president, Radiation Oncology Solutions at Varian.
