

# HondaJet most delivered aircraft for third consecutive year

The Honda Aircraft Company has announced that the HondaJet was the most delivered aircraft in its class in 2019, based on numbers provided by the General Aviation Manufacturers Association (GAMA).

During 2019, Honda Aircraft Company delivered 36 aircraft to customers globally, becoming the most delivered very light jet for the third consecutive year.

"We are pleased that customers across the globe continue to demonstrate a preference for us, as they are able to identify our best-in-class performance and the distinct innovation embodied by our product," said Michimasa Fujino Honda Aircraft Company President and CEO. "We are continuously improving our efficiency, overall performance, and cabin comfort in order to be at the forefront of transformative technology that proves the value of very light jets for efficient travel to all types of users."

In 2019, the company received type certification from China's Civil Aviation Administration of China, Canada's Transport Canada Civil Aviation, and Turkey's Directorate General of Civil Aviation. The company is also proud of the significant diversification of uses for the HondaJet Elite, which began including medevac configurations in air ambulances in 2019.

The company is currently in the process of constructing a new \$15.5m, 83,000-square-foot wing production facility, which began in 2019 and is scheduled for completion in 2020, at its worldwide headquarters in Greensboro, North Carolina.
