

All-in-one shampoo for thicker, fuller and dandruff-free hair

Issued by [ACDOCO SA](#)

10 Mar 2021

Thinning, dandruff and de-energised hair are big concerns for men. One of the world's leading* male hair care brands, Alpecin®, has a unique formulated shampoo that addresses these concerns. Alpecin Double-Effect Caffeine Shampoo is a brilliant dual-solution that offers great value for money and time-saving convenience.

Double-Effect Caffeine Shampoo is an effective dual-solution that simultaneously removes oily dandruff from the scalp by loosening scaly, keratinous cells and preparing the way for the caffeine complex to reach the hair roots, ensuring stronger, more energised hair**, free of dandruff. Just simply apply to wet hair, massage into scalp, leave on for two minutes and then rinse. It's that easy.

The combination of two effective anti-dandruff substances salicylic acid and piroctone olamine results in a gentle dandruff removal, soothing action, improved resistance and antimicrobial properties. Alpecin Double-Effect Caffeine Shampoo contains a perfectly adjusted amount of caffeine, which paves the way for the second effect whereby the caffeine stimulates the hair roots all the way along the hair during washing.

So double up on your daily grooming routine, to get double the effect!

Alpecin Double-Effect Caffeine Shampoo is available at most major retailers nationwide and online at [Takealot](#), [Clicks](#) or [Dis-Chem](#). For more information visit <https://www.alpecin.com/en-za/>
