

AWS Data Engineer

Location:	Midrand
Remote work:	Some remote work allowed
Type:	Permanent
Reference:	#MM58957
Company:	E-Merge IT Recruitment

Our valued client, a prominent player in African capital markets and a major presence in the automotive industry, is recognised for its diverse product offerings and global footprint. They are seeking a skilled AWS data engineer to join their team. This role presents an exciting opportunity to address complex challenges and deliver significant business value across various sectors.

If you have the following, apply now.

Key responsibilities:

- Display exceptional analytical abilities to dissect intricate datasets of substantial size.
- Perform thorough testing and validation procedures to guarantee the accuracy of data transformations.
- Build resilient data pipelines, leveraging platforms like AWS Glue or Data Pipeline.
- Craft precise specifications to direct the development, testing, and debugging phases.
- Foster collaboration through effective use of Enterprise Collaboration tools such as Confluence and JIRA.
- Harness expertise in Oracle SQL, showcasing prowess in data modeling.
- Create technical documentation and artifacts to meet project needs comprehensively.
- Employ Data Quality Tools like Great Expectations to maintain data integrity at all levels.
- Experience with REST API development is advantageous.
- Agile Working Model.

Qualifications:

- Bachelor's degree in IT, business, or engineering.

Experience:

- Proficiency in Trino Distributed SQL queries.
- Hands-on experience with Glue (ETL Scripting), CloudWatch, SNS, Athena, S3, Kinesis Streams (Kinesis, Kinesis Firehose), Lambda, DynamoDB, Step Function, Param Store, Secrets Manager, Code Build/Pipeline, and CloudFormation.
- Expertise in technical data modeling and schema design, emphasising practical implementation.
- Knowledge of Kafka and AWS services like EMR and Redshift.
